

HOW TO RECORD AN UNDERWATER EGGCASE

As well as going eggcase hunting on the beach...

...you can do it underwater, in search of the next generation of sharks and skates.

Look in the seaweed...

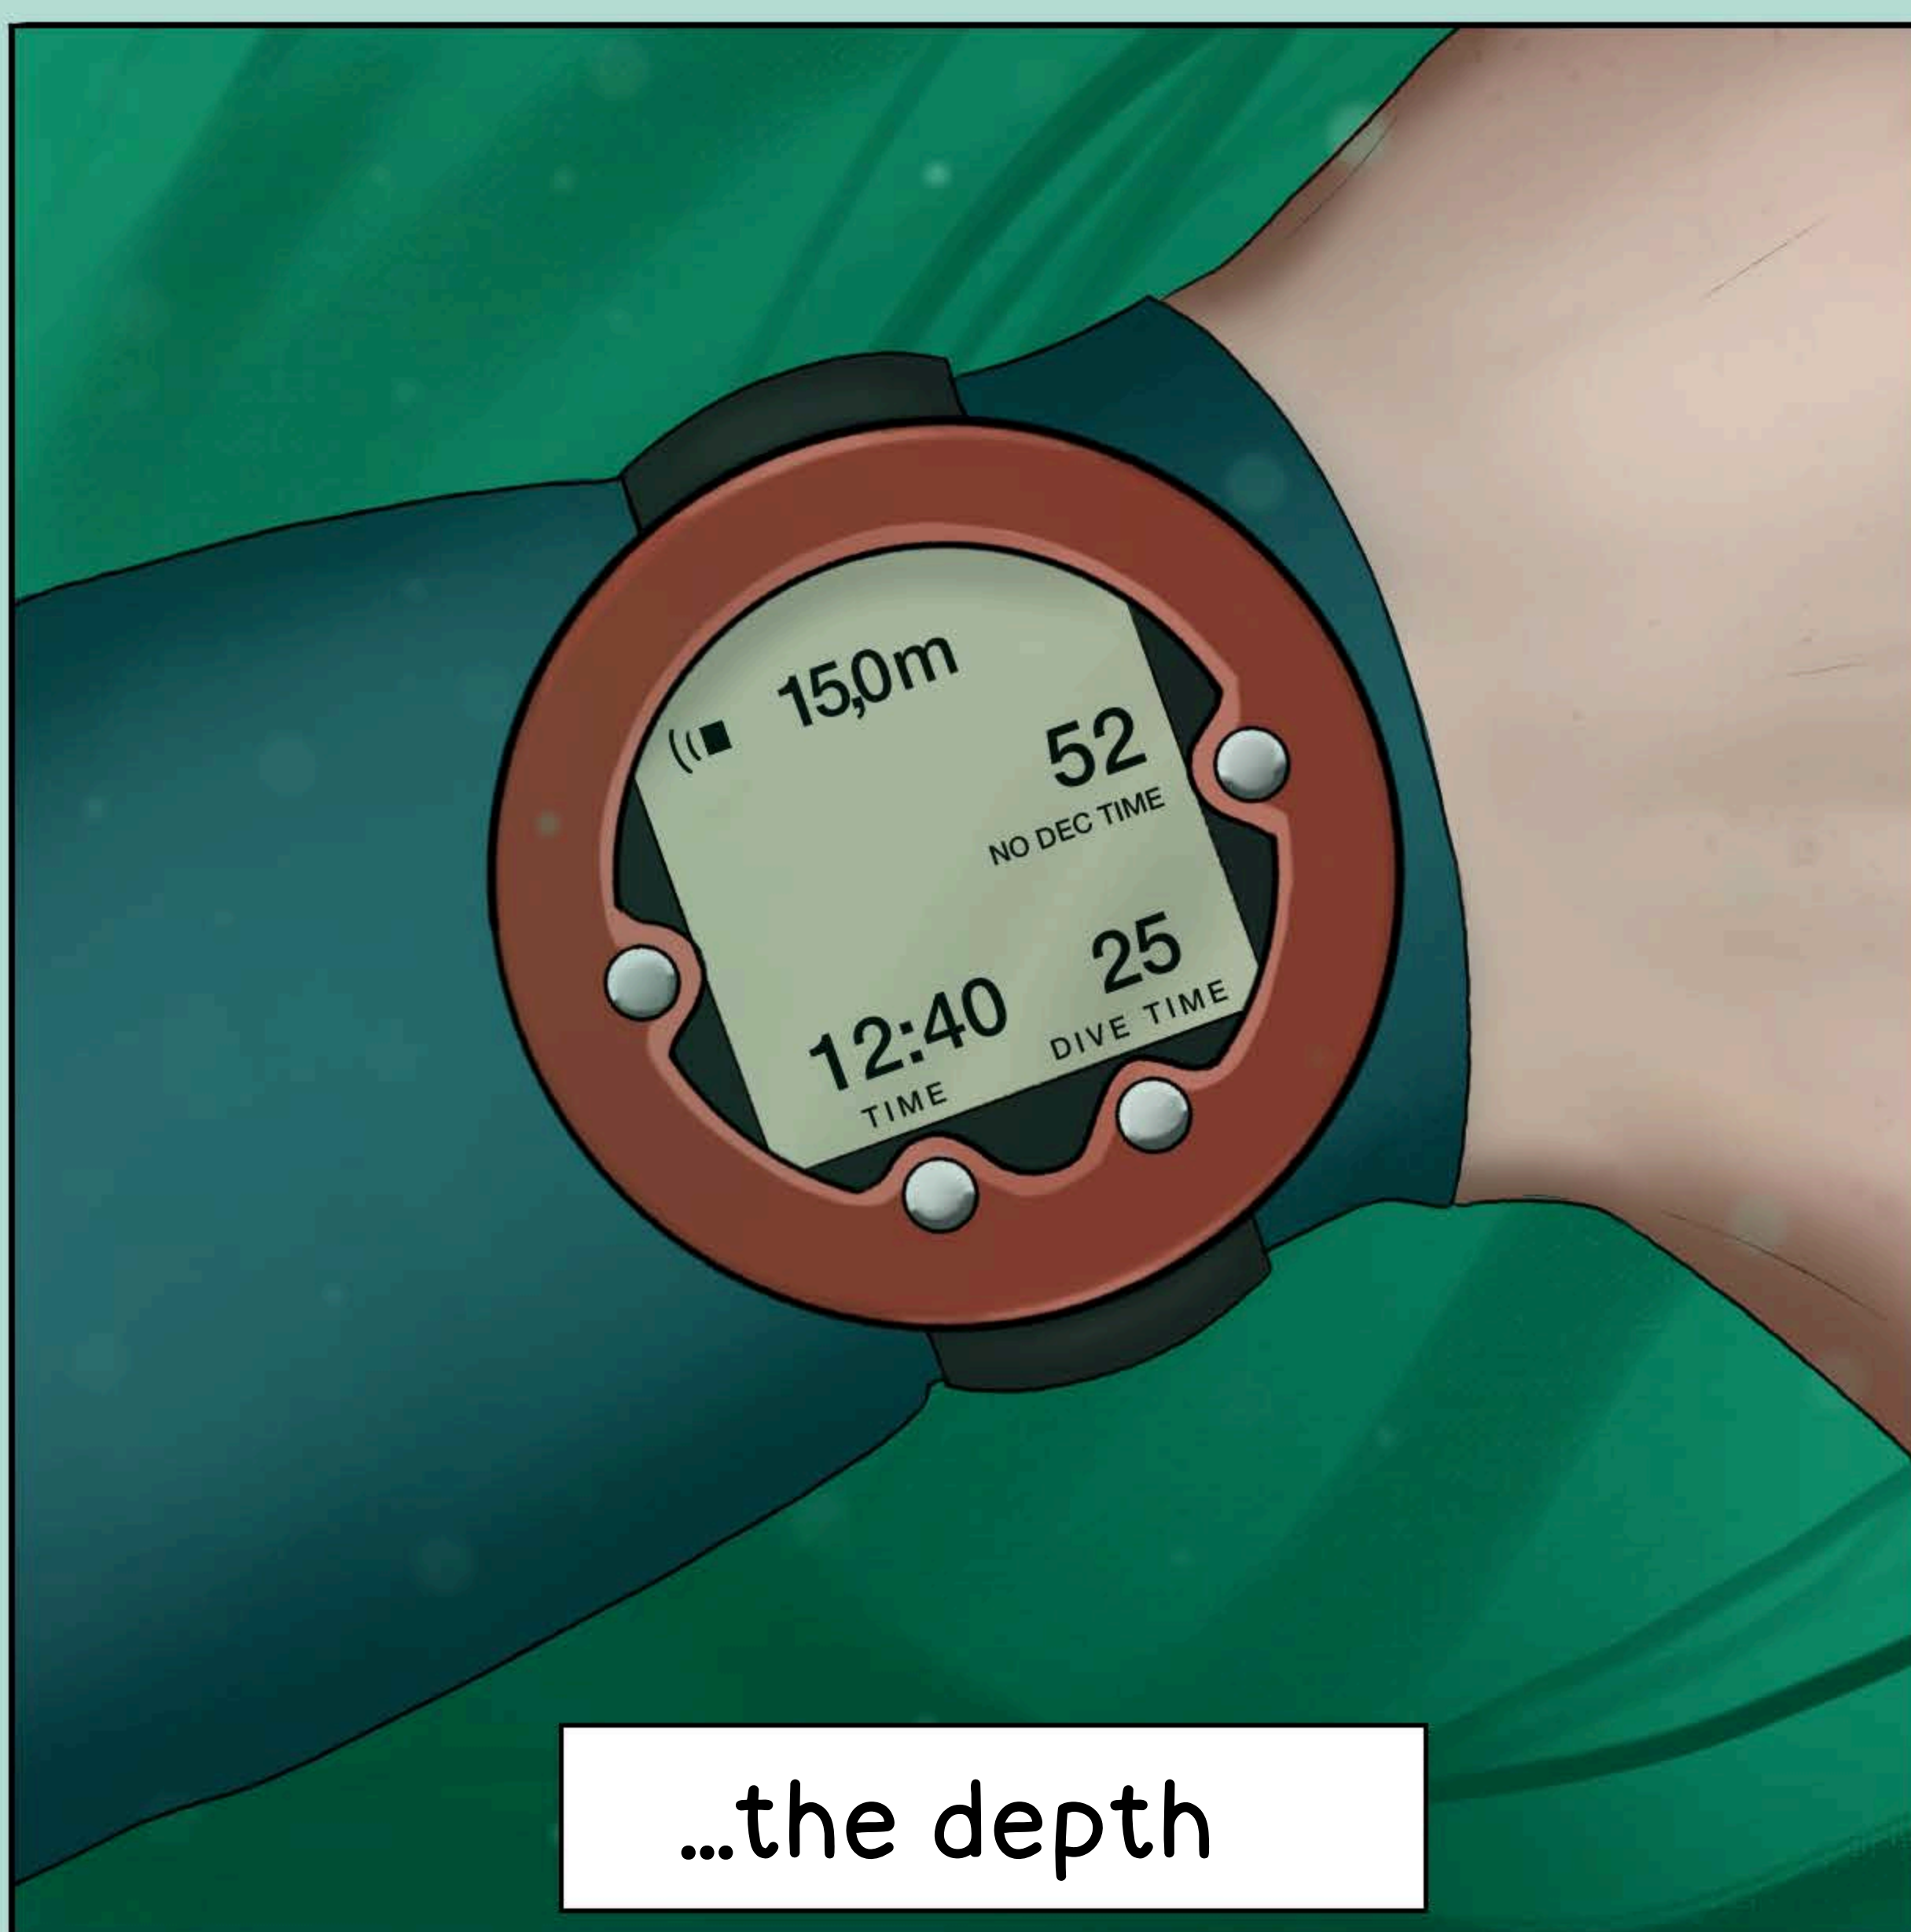

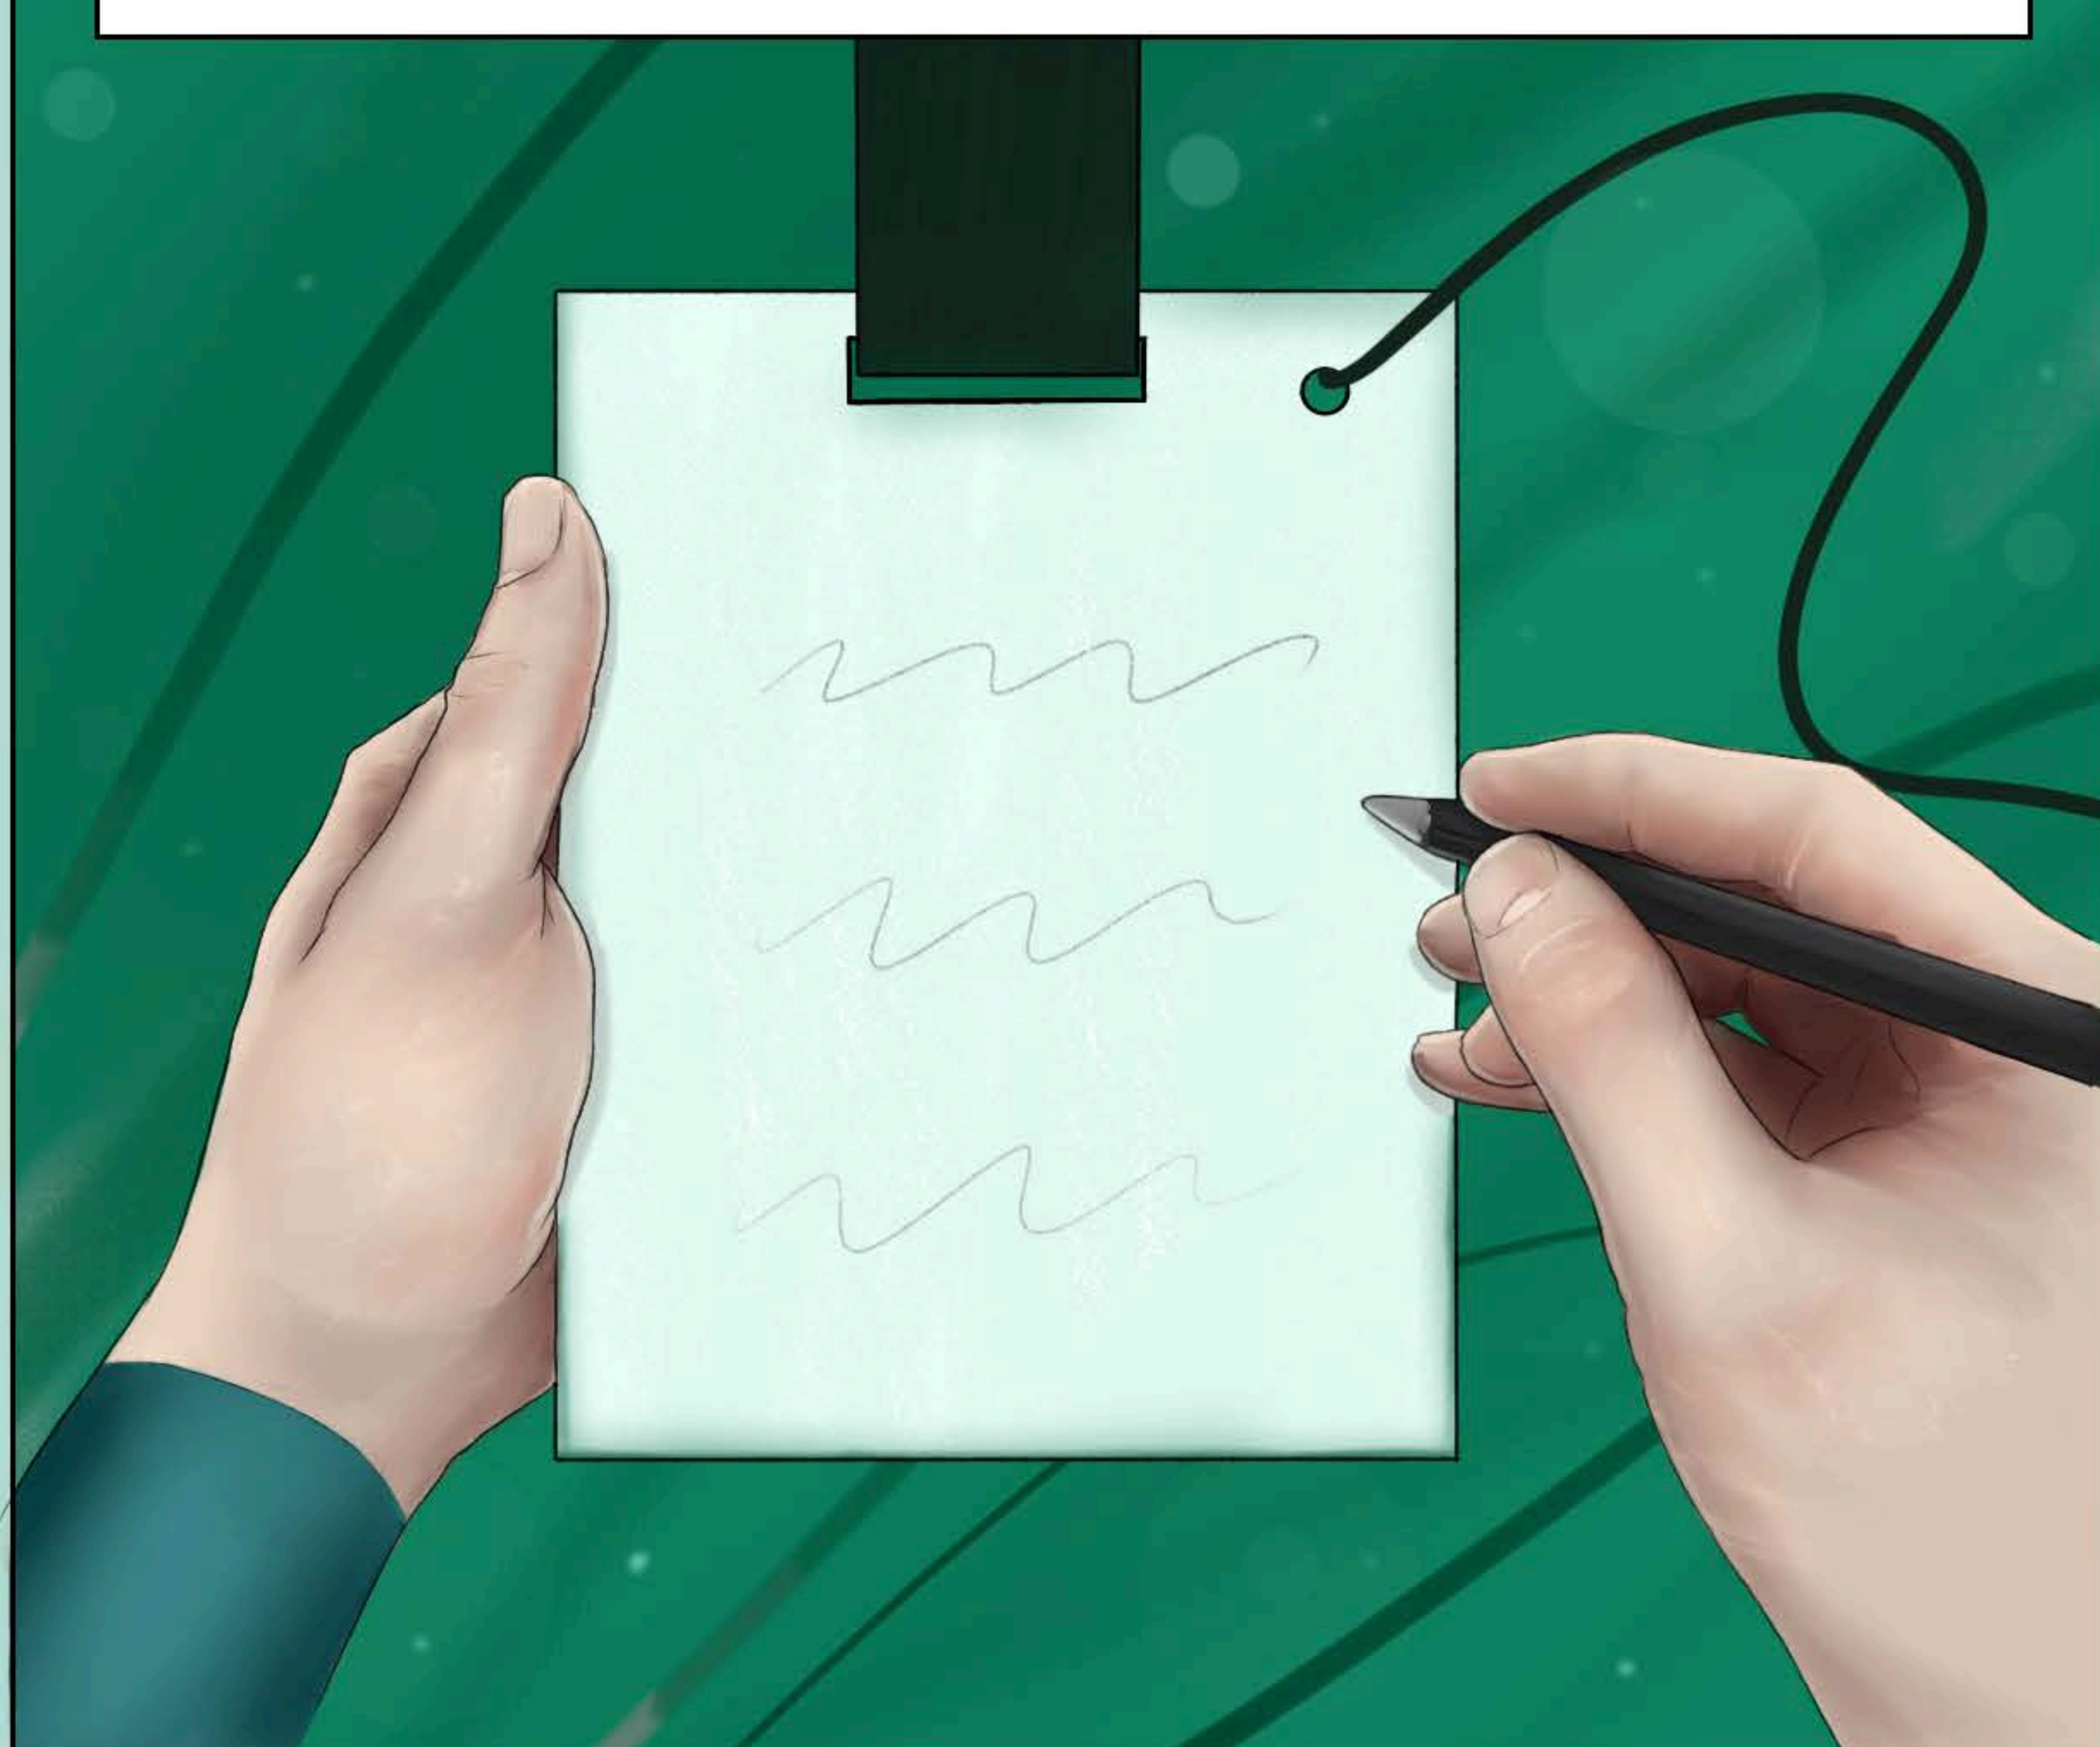

...on the sand

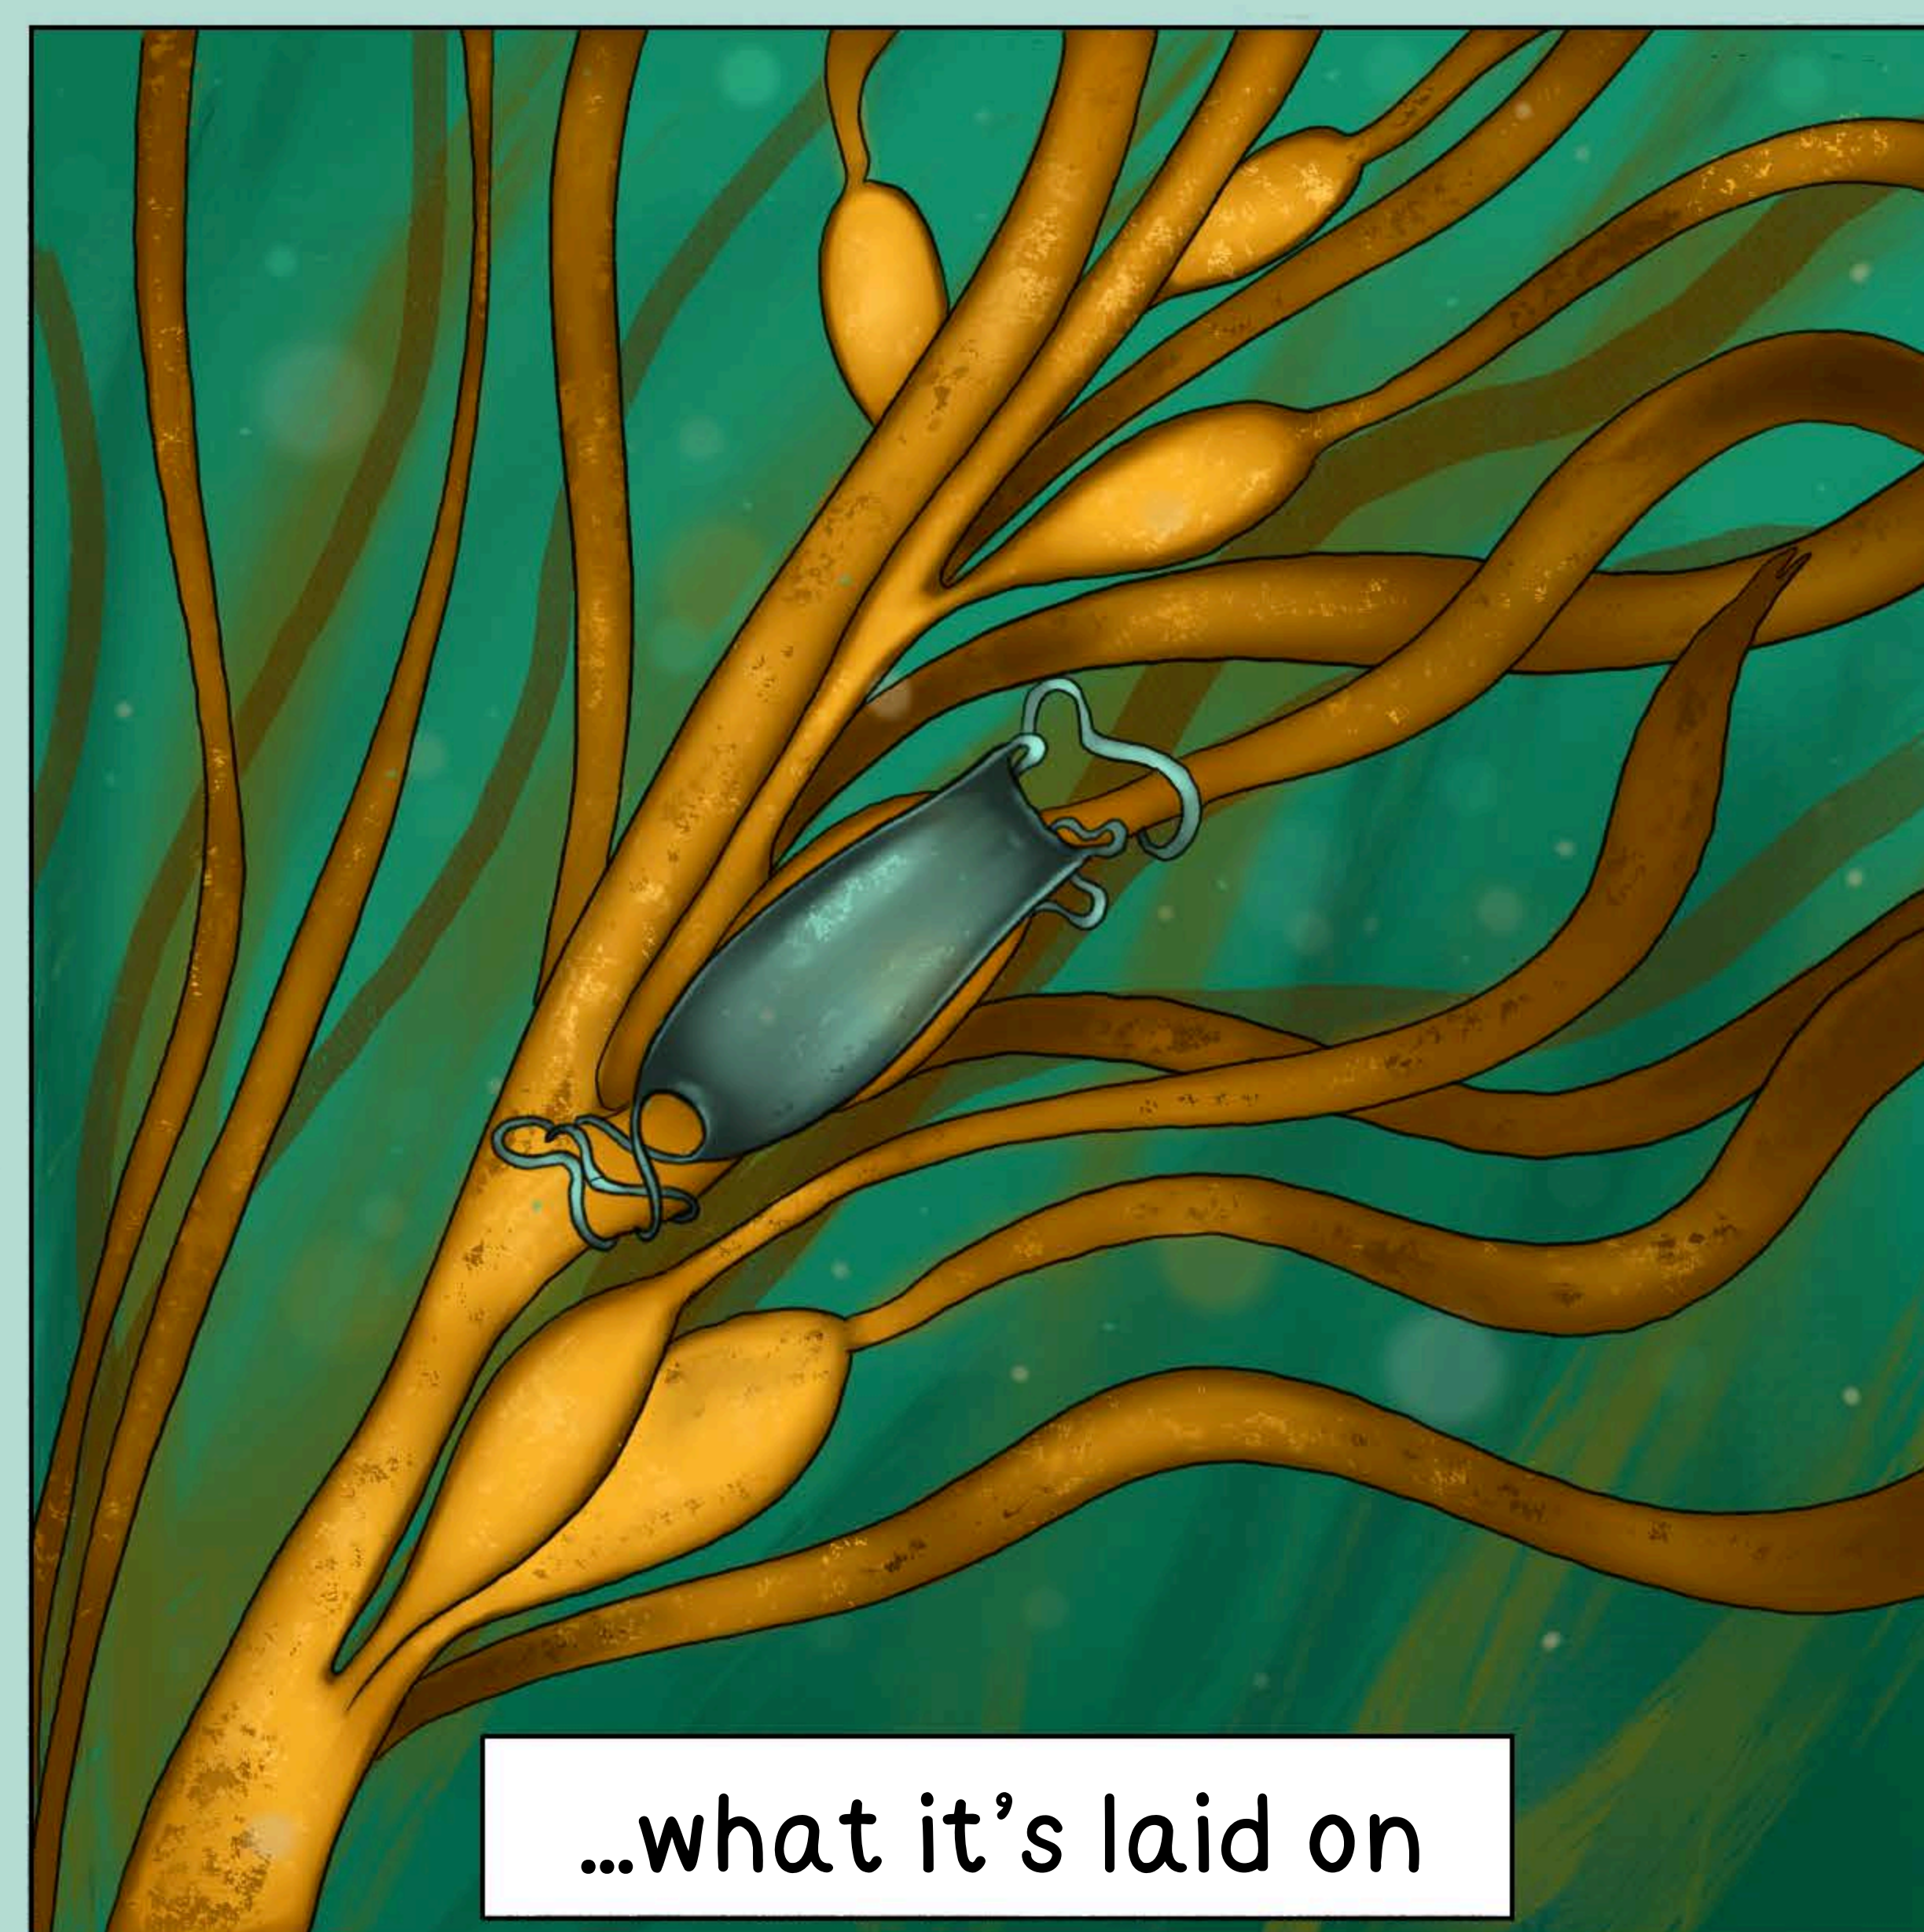

...under ledges

If you find one, don't handle it, but make note of...

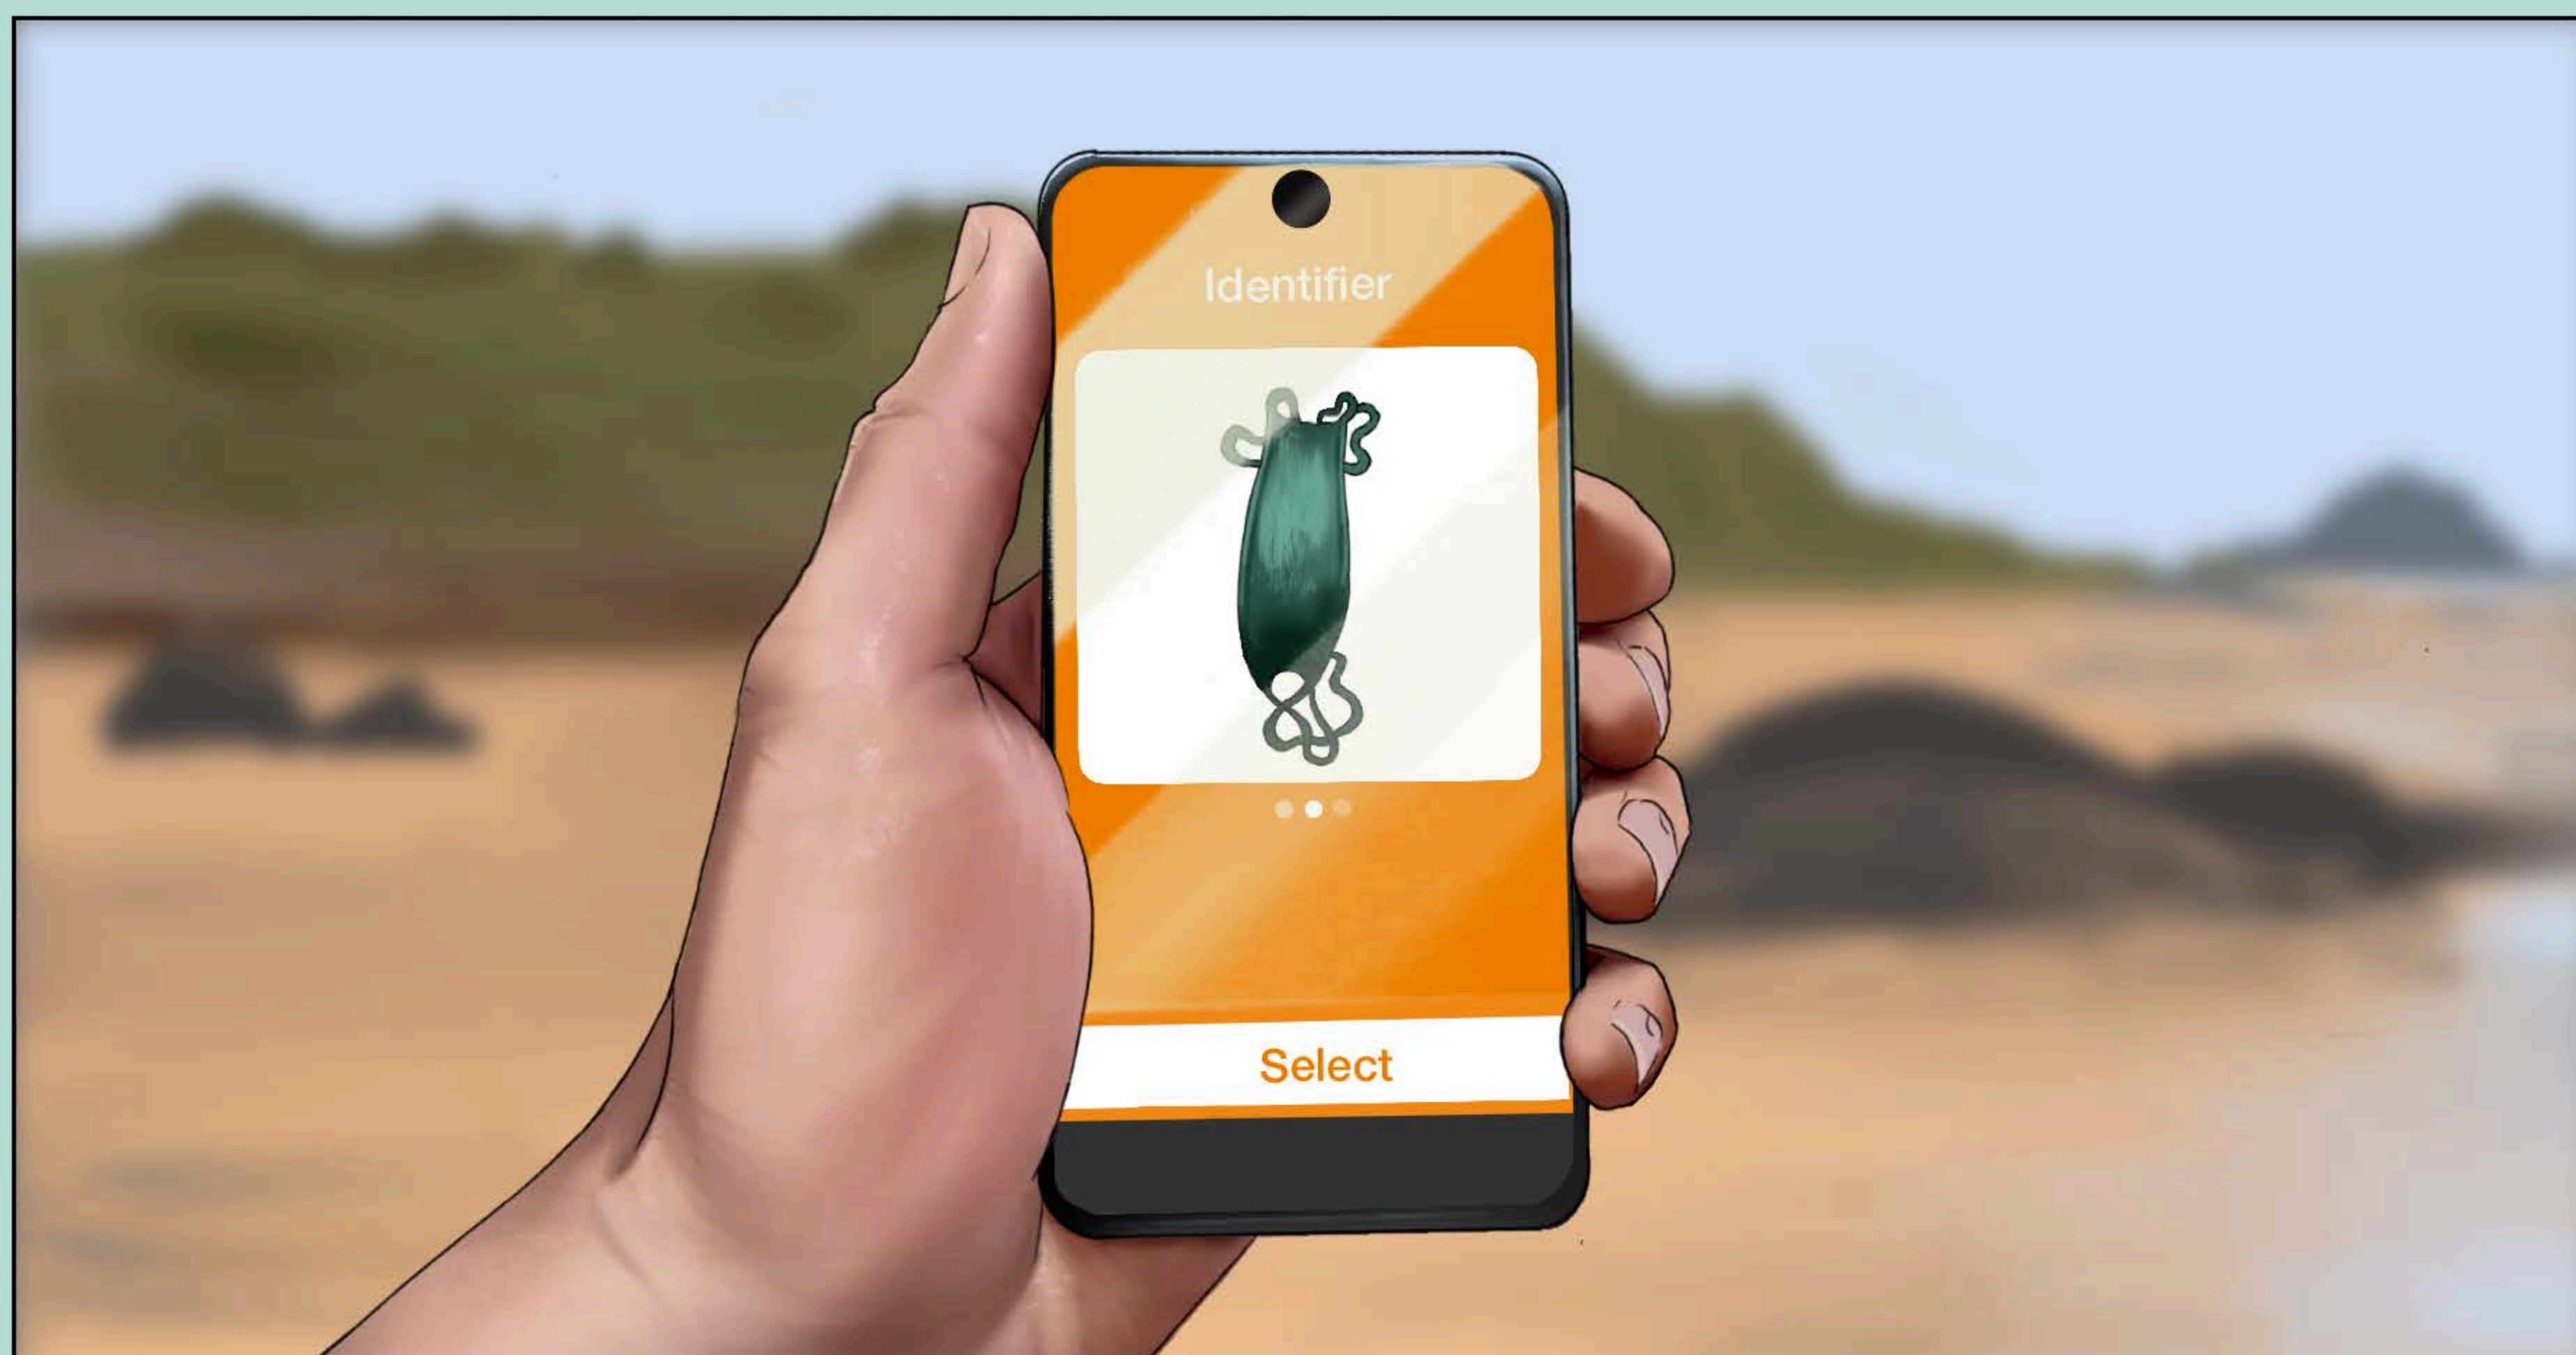

...the depth

...what it's laid on

...and take a photo

Back on land, record details (Location, depth, substrate, photos) to the Shark Trust's Great Eggcase Hunt!
